

RENATER
KNOWLEDGE CONNECTOR

Service portfolio 2022

February 2022

ABOUT US

A knowledge connector, RENATER, the French National Telecommunications Network for Technology, Education and Research, is the benchmark for academic community digital infrastructure.

RENATER proposes shared, secure digital services in a trusted framework using sovereign platforms for all French educational and research institutions.

RENATER is a public interest grouping (GIP) of which the members are the French Ministry for National Education and Youth, the French Ministry of Higher Education, Research and Innovation, France Universités as well as research organisations CNRS, CEA, INRIA, CNES, INRAE, INSERM, ONERA, CIRAD, IRD and BRGM.

Our values

TO CONNECT

Expertise: provide you secure, high-speed connectivity
Born of the will to design and operate a large national interconnection network infrastructure, RENATER provides a digital communications offer:

- Digital and Secure
- Effective and Powerful
- A single a network dedicated to the whole research and higher education community

TO SECURE

A commitment: to protect your personal and institutional data
We store your data on secure servers located in France, in a sized infrastructure and on sovereign platforms. We do not collect information or analyse your data for commercial purposes. Federated access to all our services reduces the risks that result from multiple logins and passwords.

TO SUPPORT AND FACILITATE

A role: to guide our community towards performance by providing a choice

- Meet the digital transformation challenge
- Effective and secure technology
- Choose your offer and customise the tools you give your users
- Access your services from different media (web, software, phone).

TO INNOVATE

An objective: to encourage the Education-Research community's digital transformation
Innovation is part of the RENATER teams' core trades at the service of the State's major inclusive digital projects and the creation of independent, shared and interoperable solutions. RENATER adapts its infrastructure size to meet the challenge of exponentially increasing scientific data flows.

TO FACILITATE

A will: to give you a choice
We enrich your institution's catalogue of digital services. You choose your offer, customise the tools you make available to your users and access your services as you please: web, software, smartphone or mobile app.

Organisation and community

To benefit from RENATER Services, institutions must "qualify" for their activity for the education-research community. There are two ways to subscribe to RENATER services:

Institutions under the administrative supervision of a member of the Grouping

All other education-research community institutions

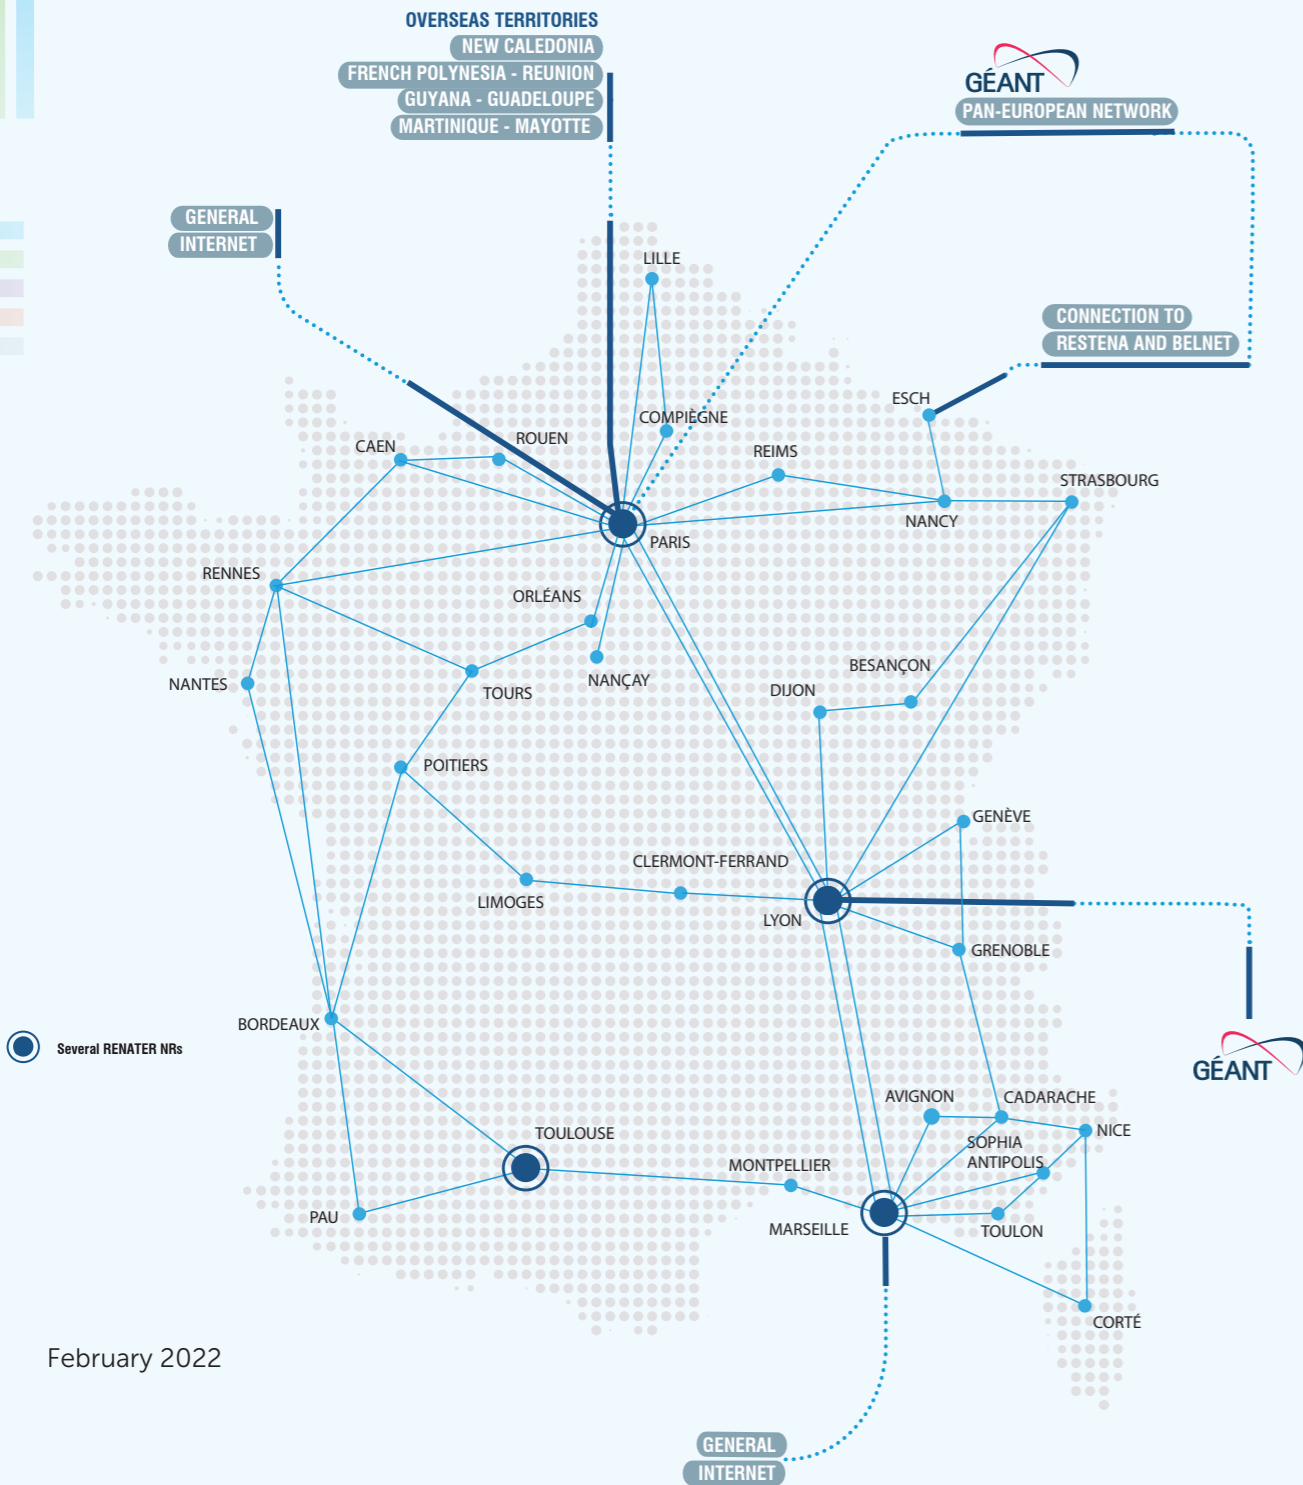

▶ **70%** of institutions connected to RENATER

▶ **30%** of institutions connected to RENATER

Our community is composed of various types of institution:

- Public educational or research institutions under the authority of the MENJ, the MESRI or a RENATER member
- Public educational or research institutions under the authority of another ministry
- Private educational or research institutions of which the activity is compliant with the RENATER charter
- Industrial laboratories for their research needs
- International research organisations (CERN, ITER, ESA, etc.)

Our expertise: Operating the network for education and research

At the service of the education-research community, RENATER provides a **highly reliable and secure network, facilitating collaboration and the convergence of scientific and academic projects at national, European and international levels** through the pan-European GEANT network.

RENATER provides Internet access and digital tools and services to **over 700 institutions in continental France and the French overseas territories**.

For more information <https://www.renater.fr/se-raccorder-au-reseau-renater>

The access networks

Institutions access the RENATER network using access networks. The French territory has widespread coverage from **fifty or so access networks** making it possible to provide the Education-Research community the best possible quality of service.

National coverage completed by

over 50
access networks

RENATER provides end-to-end quality of service by supporting the access network community, organising workshops on access network governance, economics and technical models.

The RENATER CERT

The RENATER CERT has been active since 1995. Its role is to provide its members computer security support, in particular the prevention, detection and resolution of security incidents. Its primary role is to be the point of contact, i.e. the structure that is called upon for assistance and that organises

the rescue when incidents occur. This structure makes it possible to centralise information and distribute it using secure channels.

For more information <https://www.renater.fr/fr/le-cert-renater-partenaire-securite-de-l-esr>

Our added value: providing you associated digital services

Thanks to our network performance and security, we can provide high quality services included in our connectivity package to meet all your needs as an education-research community institution.

Collaboration is essential in your field.

Our role is to give you the services that facilitate sharing and pooling of work within the community.

RENATER is uncompromising when it comes to the security of all its services:

- Access to all our services is secured using authentication via identity federation.
- Our services are sovereignly hosted on our platforms. So your data stays in France, guaranteeing you high security.
- Security is an integral part of RENATER's organisation: the Information security team reports to the Managing Director. There are security experts in each operational department.

Our service portfolio

We provide three ranges to meet all your needs as an education-research community institution.

- The **"Connecting to the education-research community"** range is intended to provide interconnection between our community institutions to give them all access to significant digital resources. This range is **intended for heads of institutions**.
- The **"Securing uses"** range identifies your data security and integrity as a key issue. Further to protecting and guaranteeing the storage of your data in France, we offer various security services that can be included in your information systems. This range is **intended for institution technical experts**.
- The **"Collaborate effectively"** range offers different services created in line with data privacy to offer alternatives to free online services. This range is **intended for all institutional users**.

Our three service ranges:

Connecting to the research-education community

intended for heads of institutions

Our secure, effective network for the education-research community

Our access service to resources available on the State inter-ministry network

Our virtual private network service for your sites

Our secure mobile WiFi access solution for the global education-research community

Secure uses

intended for institution technical experts

Our authenticated, secure access service to community resources

Our solution for easy access to the Education-research federation

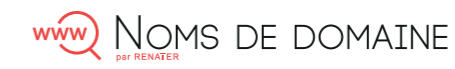

Our internal messaging security tool

Our system vulnerability scan service

Our electronic certificate solution for your applications

Our internet domain name management tool

Collaborate effectively

intended for all users

Our collaborative messaging

Our video conference bridge booking tool

Our web conferencing tool

Our large file transfer service

Our event planning service

Our mailing list work platform

Our collaborative software forge

Connect to the education-research community

RENATER puts its network expertise at your service to digitally equip your institution. The power of our network provides connectivity in line with your institution's priorities by adapting to the specific flows and needs of the community.

Our 2022 offers:

For you to benefit from the performance and security of the RENATER network, we propose a system of packs, including IP services (according to a wide range of IP speeds) giving you access to the general Internet as well as to all our services.

THE BENEFITS OF THE RENATER OFFER

-  **Secure and reliable network** reserved for the education-research community.
 -  **Unrestricted bandwidth** allowing for occasional peaks in consumption
 -  **Specific offers** for multi-site institutions
 -  **Access to all our services*** (Connect, Secure, Collaborate)
- *there are optional services

IP SERVICES IP par RENATER

OUR SECURE AND EFFICIENT NETWORK RESERVED FOR THE EDUCATION-RESEARCH COMMUNITY

Connect your institution to the RENATER network and securely connect with the national and international education-research community.

YOUR BENEFITS

 **As a head of institution:**
You get our dedicated community broadband network with guaranteed resilience and occasional overshoots allowed according to your needs.

 **As an IT expert:**
You will get support for the implementation of this service, particularly for the allocation of IPv4 or IPv6 addresses and address routing requests.

 **As a user:**
You get the high-speed performance of our network as well as complete personal data protection.

WHY CHOOSE RENATER?

High performance: Very high performance network for education and research, of a capacity of 100 Gbit/s to nearly 1 Tbit/s depending on the axis.

Guaranteed resilience: By the meshing of a 24/7 network with target incident recovery times under 4 hours.

National network: Providing secure access to the network exclusively dedicated to the Education-Research community.

Tailored to your needs: Different packs to choose your speed from.

EON par RENATER OUR NTP TIME SERVER

With Eon you can synchronize your IT equipment and clocks to RENATER'S reliable time servers.

WHY CHOOSE RENATER?

Included in the IP services: Eon is now one of the IP Services offered by RENATER. To get this service ask your establishment's contact person to follow the PASS procedure.

Connect to the Education-Research community

OUR ACCESS SERVICE TO RESOURCES AVAILABLE ON THE STATE INTER-MINISTRY NETWORK

INCLUDED IN THE RENATER PACK

RIE partner allows you to be connected to all the State services on the national territory. The service provides the secure transport of internal flows within entities as well as secure exchanges with third-party networks, in particular the Internet and the European Community Inter-State Network (TESTA).

WHY CHOOSE RENATER?

A multitude of exclusive resources:

- Access to a department's business IS or access of a ministry to a partner's business IS.
- Partner access to an inter-ministry business IS (e.g.: Chorus, Diplomatie, ORME, RenoiRH, Solon, contract drafting assistance tool, etc.).
- Partner access to an inter-ministry resource of general interest (e.g: Alfresco, Extraqual, Intranormes, MAIA directory, National directory of non-profits, ...).

YOUR BENEFITS

As a head of institution:

You benefit from data transfer with the state network and third party networks.

As an IT expert:

Your administrative procedures are facilitated by an access request via PASS.

As a user:

You get access to services hosted on the state's inter-ministry network.

OUR VIRTUAL PRIVATE NETWORK SERVICE FOR YOUR SITES

AVAILABLE AS AN OPTION.

To connect several sites together, each must have a VPN subscription. The VPN speed is the lowest pack's speed.

Set-up costs and fees apply.

Get a secure virtual private network to transport information and simplify the convergence of communication tools between all your remote sites or between the sites of several institutions.

WHY CHOOSE RENATER?

The L2VPN service: Two distant sites can have a private interconnection between them on the RENATER infrastructure.

The L3VPN service: Several remote sites can have a private network that ensures inter-site communication in a fully meshed mode.

Multi-domain VPNs: This feature lets you extend your VPNs between several institutions in France but also in Europe as part of European collaborations.

YOUR BENEFITS

As a head of institution:

You get meshed inter-site communication to share internal resources and protect your users' personal data.

As an IT expert:

You get personalised support in setting up the service.

As a user:

The data transported using VPN Services does not leave a secure private network, even in the context of European projects.

Connect to the Education-Research community

INCLUDED IN THE RENATER PACK

106

countries participating in eduroam's global wifi coverage

311

institutions in France use eduroam

OUR SECURE MOBILE WIFI ACCESS SOLUTION FOR THE GLOBAL EDUCATION-RESEARCH COMMUNITY

Give your nomad users secure access to the Internet from all the member institutions, and offer this encrypted wifi in your own institution for your users and your guests.

WHY CHOOSE RENATER?

A solution that makes life easier: The connection is set up simply and transparently (same login and password regardless of the geographical location) between the user's home institution and the hosting institution.

Centralised authentication: The home institution authenticates users through a hierarchy of radius servers.

“ I really appreciate that it is a national service. I was able to access the internet in Strasbourg and Reims when travelling without having to request a guest account. ”

University of Lorraine user

YOUR BENEFITS

As a head of institution:

You get support for the implementation of this service, particularly for the allocation of IP addresses and address routing requests.

As an IT expert:

You benefit from eduroam CAT to help you deploy eduroam on your users' workstations more easily.

As a user:

You get the high-speed performance of our network as well as complete personal data protection.

Secure uses

As digital technology evolves, your information system is increasingly exposed to external threats. Your uses are changing and your institutional data is of considerable value. For a successful digital transformation, RENATER supports the integration of everyday security and data protection by your teams.

OUR AUTHENTICATED, SECURE ACCESS SERVICE TO COMMUNITY RESOURCES

INCLUDED IN THE RENATER PACK

380

Federation member institutions

Over **1,200** services in the EDUCATION-RESEARCH Federation

Give your users the possibility of accessing a range of services (ENT, e-learning platform, collaborative tools, etc.) simply and securely.

WHY CHOOSE RENATER?

Community pooling: Access RENATER services and services operated by other institutions using your usual login page, in accordance with your institution's security policy.

Local federations: Create your own local federation to meet your needs for inter-institutional cooperation (COMUE, geographical area, grouping of schools, etc.) or to facilitate the management of your local SPs within your institution.

Everyday work made easier: No need to remember a new login and password for each new service, just use your institution's user account.

Access to additional resources: Access resources provided by members of the eduGAIN international inter-federation by logging in from your home organisation.

YOUR BENEFITS

As a head of institution:

The Federation meets pooling needs between organisations, addresses nomad user issues and facilitates compliance with the GDPR.

As an IT expert:

You no longer need to manage user accounts with passwords for each service.

As a user:

Access all your services wherever you are using the same login and password.

OUR SOLUTION FOR EASY ACCESS TO THE EDUCATION-RESEARCH FEDERATION

POOLED OFFER INCLUDED IN THE RENATER PACK (see offer below)

Over **20** institutions benefiting from the pooled offer

Over **20** institutions benefiting from the specific offer / over **50,000** users

RENATER proposes two identity provider hosting offers (pooled and specific), to facilitate access to the Federation.

The pooled Identitas offer is for small structures. It allows you to benefit from a turnkey identity provider shared with other institutions of similar size (RENATER Connect).

The specific Identitas offer is for medium-sized structures that want more flexibility. It offers you the possibility of customising your Identity Provider configuration

WHY CHOOSE RENATER?

RENATER supports you: The identity providers are deployed, hosted and maintained by RENATER. You therefore get RENATER's expertise and reduce the costs related to the management of this complex building block.

A configuration as close as possible to your needs (specific offer): Some of your additional needs can be taken into account (CAS delegation, local federation, connection of a specific service, ...).

Two tools in one: Provision of a directory and a user account management interface for institutions that do not already have one in their local IS.

YOUR BENEFITS

As a head of institution:

Benefit from the outsourcing of a complex and costly to maintain component as well as from the global pooling of your resources.

As an IT expert:

Focus on your other activities (directory, ...): we manage the deployment and the maintenance of your IdP.

As a user:

Thanks to the Federation, you have access to all your services and to all the services available in the Federation, always using the institution user account.

OUR INTERNAL MESSAGING SECURITY TOOL

To secure your internal email, AntiSpam allows you to check your incoming messages, protect your servers from malicious connections and manage threats and suspicious emails outside your network.

INCLUDED IN THE RENATER PACK

4 billion messages processed in 2021

On average **3 million** inboxes protected per year

WHY CHOOSE RENATER?

An essential solution: AntiSpam analyses your messages to identify spam and virus vectors. Hacking is evolving and it is essential that your institution be protected from all existing threats.

A customisable tool: You keep control over filtering policy customisation (white and black list management, domain by domain, marking thresholds, etc.).

YOUR BENEFITS

As a head of institution:

Your internal messaging is secured from growing external threats.

As an IT expert:

The counter lets you manage the domains to be protected and you get an administration console adapted to your needs.

As a user:

You have an unsaturated and secure mailbox on a daily basis.

OUR SYSTEM VULNERABILITY SCAN SERVICE

With Scan'ER, you can scan your networks and information systems to find out which machines are open to the outside world, detect any vulnerabilities on those machines and draw up a general network security diagnosis.

INCLUDED IN THE RENATER PACK

Over **400,000** scans in 2021

Almost **200,000** machines discovered in 2021

WHY CHOOSE RENATER?

Create dashboards: You can extract detailed or summary reports in pdf or csv format.

A customisable tool: You can choose to enable regular or immediate scans on identified machines or groups of machines that you define.

The use of this service is reserved for information systems security managers or security correspondents named in PASS.

YOUR BENEFITS

As a head of institution:

You get RENATER's security expertise guaranteeing that collected data is protected.

As an IT expert:

You benefit from real-time knowledge of your network's overall security level by scanning the machines on your network.

As a user:

RENATER provides your CISO with the means to secure your work environment.

OUR ELECTRONIC CERTIFICATE SOLUTION FOR YOUR APPLICATIONS

INCLUDED IN THE RENATER PACK

355 organisations with
1,100 correspondents

35,000
active certificates

TCS provides electronic security certificates for your online applications.

WHY CHOOSE RENATER?

Reliable solution: Our digital certificates are recognised by most software by default.

Renamed solution: Used by all RENATER counterparts in Europe via GEANT.

Several services available:

- A server certificate service.
- A personal certificate service.
- An object signing certificate service.
- A document signing certificate service.

“ The SCM portal works well, is user-friendly, and certificates are issued immediately. ”

YOUR BENEFITS

As a head of institution:

TCS is based on a recognised solution used by some thirty other European networks.

As an IT expert:

No prior configuration required. Our certificates are recognised most software by default.

As a user:

You can use your online applications with complete peace of mind.

OUR INTERNET DOMAIN NAME MANAGEMENT TOOL

1ST DOMAIN NAME INCLUDED IN THE RENATER PACK

Almost
4,400
.fr domain names

The Domain Names service lets you to choose and register your website domain name in .fr and prd.fr.

WHY CHOOSE RENATER?

A secure and sovereign solution: RENATER is an AFNIC accredited registrar.

RENATER takes care of everything: We manage the creation, renewal, transfer, change of holder and deletion of your domain names.

YOUR BENEFITS

As a head of institution:

RENATER manages the connection with AFNIC, less formalities for your institution.

As an IT expert:

You can access our free documentation to configure the server in the best possible way.

As a user:

You can browse your institution's website with complete peace of mind.

Collaborate effectively

The way you collaborate is changing: on the move, in the office or work from home, with teams on several sites or during inter-institutional projects, ...

So that you can cover all situations, RENATER offers a range of collaborative tools that meet your needs and accompany you in your research and education projects.

Our PARTAGE 2022 offer:

2021 OFFER	8/5 OR 24/7 SUPPORT	SIZE	BACKUP
XL	24/7	10 Gb	3 months
L	8/5	5 Gb	1 month
M	24/7	1 Gb	without
S	8/5	1 Gb	without

Set-up costs and fees apply.

Storage management flexibility:

- ▶ **Global storage management:** Regardless of the pack(s) you subscribe to, your storage is globalised.
- ▶ **Free S packs:** when you subscribe to an XL or L package, you benefit from 5 free S packs without additional storage to allocate to your users as you wish.

- All your data is stored on sovereign servers in France, at RENATER.
- Almost 30 million outgoing messages per year.

▶ Receive and send your emails securely:

Online collaborative messaging makes it easy to process and organise them wherever you are.

▶ Manage your address book:

Create new contacts, manage and share your address book independently.

▶ Manage your daily appointments:

A true electronic diary that can be shared with colleagues, making it easier to organise meetings and make appointments.

▶ Manage your daily tasks and receive alerts:

Create to-do lists, set reminder notifications and share your task lists with other users.

OUR COLLABORATIVE MESSAGING

AVAILABLE AS AN ADDITIONAL OPTION
(subject to an approval agreement)

Almost **630,000** users in 2021

Almost **70** institutions in the PARTAGE community

Much more than a simple messaging system, our collaborative messaging system facilitates your everyday organisation and exchanges thanks to its many collaborative work features associated with your mailbox.

 Synchronise your email and diary with your smartphones and tablets.

 Send instant messages

 Store and share your documents

 Get easy access to other Education-Research community collaborative services.

YOUR BENEFITS

As a head of institution:

You take part in a pooled education-research community service on a sovereign solution with hosting in France.

As an IT expert:

You get PARTAGE's outsourced platform without having to manage the tools with the administrative flexibility of an in-house platform giving you access to a high degree of service use customisation.

As a user:

You get a messaging system with integrated communication tools such as shared calendars and web conferencing.

Collaborate effectively

OUR VIDEO CONFERENCE BRIDGE BOOKING TOOL

INCLUDED IN THE RENATER PACK

Almost
60,000
conferences
in 2021

Using RENAvisio, you can have a reliable and simple video-conferencing solution by connecting using its web interface or by phone. Access the video-conferencing bridge directly from your meeting rooms equipped with video equipment or download our software to access it from your workstation.

WHY CHOOSE RENATER?

Simplified access: Only the organiser is authenticated using identity federation beforehand to schedule the video conference.

Additional features: RENAvisio+ provides an additional high definition experience and flow encryption when the video conferencing equipment allows it.

“*RENAvisio is very interesting for meetings of several people with good image and sound quality for a large room.*”

Comue UPE User

YOUR BENEFITS

As a head of institution:

You have a solution that is part of the RENATER pack for your video conference rooms.

As an IT expert:

All you need to do is configure your firewall and your video conferencing equipment.

As a user:

You can book a video-conferencing bridge in advance or instantly depending on your needs.

OUR WEB CONFERENCING TOOL

INCLUDED IN THE RENATER PACK

Almost
250,000
web conferences in
2021

Work together remotely using Rendez-Vous by creating virtual meetings managed and chaired remotely. You then get features such as webcam use, screen sharing, instant messaging, exportable shared note-taking, etc.

WHY CHOOSE RENATER?

High availability: Rendez-vous can be accessed directly from your desktop without downloading any software, or from your mobile device using the dedicated app.

Flexible access: Rendez-vous is instantly accessible from web browsers without prior booking or special video equipment. The service is also available to anyone outside the community as guests, whether they are in France or not.

Simplified authentication: Only the organiser is authenticated using identity federation beforehand to start the web conference.

“*It's easy to use on PCs regardless of the OS without the additional installation of a (more or less) up-to-date browser for immediate organisation of the meeting. The links can be customised, making it possible to keep the same one over time (and therefore bookmark it).*”

INSA Rouen user

YOUR BENEFITS

As a head of institution:

You provide your teams a web conferencing solution included in the RENATER pack for about thirty participants.

As an IT expert:

Rendez-Vous is based on the free Jitsi solution, no configuration required.

As a user:

You get our secure browser-accessible tool without downloading software to replace your face-to-face or phone conference meetings.

OUR EVENT PLANNING SERVICE

INCLUDED IN THE RENATER PACK

Almost **200,000** eventos created in 2021

Almost **1.5 million** participations in eventos in 2021

To simply and effectively plan your events, Evento allows you to take into account participant availability and requests. The user-friendly web interface lets you connect your professional diary to benefit from additional features such as unavailable date alerts, etc.

WHY CHOOSE RENATER?

Smart configuration: The advanced options give you:

- "Maybe" answers.
- Comment visibility.
- The possibility of hiding the answers from other participants.

Practical features: To view your unavailability when creating or responding to an Evento.

Security: Your data will never be passed on to third parties and you can use the service without being bothered by eventual advertising.

"I started using Evento after the lockdown. I was able to complete several surveys to determine when I would be present at my workplace. I was also able to create a survey to determine when I would present my thesis. In my opinion, this service seems to be a reference in the Higher Education and Research community. My contacts are used to it and I trust RENATER to take into account security and confidentiality issues."

INSA user

YOUR BENEFITS

As a head of institution:

You get a secure service which is a good alternative to commercial solutions.

As an IT expert:

You benefit from our Moment open source project initiated by RENATER and hosted on SourceSup.

As a user:

You can easily create small date surveys by connecting your calendar.

OUR LARGE FILE TRANSFER SOLUTION

INCLUDED IN THE RENATER PACK

In 2021 **23 million** transfers made with over **6 million** uploads and **16.5 million** downloads

46,000 users per month on average

FileSender lets you share files of up to 100Gb with a guarantee that your data is secure. Your files remain available for download for up to 30 days.

WHY CHOOSE RENATER?

Available to all: all users can access the documents using an e-mail invitation or a URL link, regardless of whether they are part of the Education-Research community or not.

Highly accessible file transfers: Your contacts outside the Education-Research community can also send you large files via an invitation.

Innovating features: You can track the number of times your contacts download your documents in real time.

"I use FileSender because as I create videos, I often send large files that can be several Gb in size, depending on the use. This service is essential to my work, in the past, sending big files was a real headache, if not impossible with the web offer and it was much more complicated to have to manage an FTP server (manage rights, server access times, etc.). FileSender makes my everyday life easier, and not just a little easier."

CIRAD user

YOUR BENEFITS

As a head of institution:

Your data is stored in France on our sovereign platform.

As an IT expert:

Our tool is based on the open source FileSender software, a secure solution used by all the European academic networks.

As a user:

You can transfer documents up to 100Gb.

Collaborate effectively

OUR MAILING LIST WORK PLATFORM

INCLUDED IN THE RENATER PACK

8,600
hosted lists

6 million
messages sent
per month

Universalistes is a work platform that allows you to easily host your inter-institutional mailing lists which is intended to simplify collaborative work in the Education-Research community.

WHY CHOOSE RENATER?

Simplified use: Automatically receive all messages sent to the lists you subscribe to in your email. You can also choose to control the service by email or using a web interface.

Your customised choices: Subscribe to the lists you are interested in using its referencing system and interact with its subscribers: send messages, answer them or read sent messages without participating.

Additional tools: Universalistes is supplemented by collaborative tools which can be accessed directly from the list's web interface: Wiki, LimeSurvey a survey tool, Evento and FileSender.

YOUR BENEFITS

As a head of institution:

You offload your list hosting services that are not your exclusive responsibility.

As an IT expert:

You don't need to provide support for the service.

As a user:

You can set up inter-institutional work groups and benefit from the tool's rich features as well as a point of contact with experts capable of adapting the tool to your use.

OUR COLLABORATIVE SOFTWARE FORGE

INCLUDED IN THE RENATER PACK

Over
12,500
registered users

Almost
5,000
hosted projects

Our project management tool gives you the possibility of hosting education-research community IT projects while having access to the collaborative tools needed for your digital project development activities.

WHY CHOOSE RENATER?

Smart features: SourceSup has features such as change management, continuous integration (Jenkins, Sonar, Naxus), test book management (Testlink), task management and electronic document management (Nuxeo or Wiki), etc.

Data protection: Project code hosted on SourceSup remains in France for private projects.

YOUR BENEFITS

As a head of institution:

We host your IT projects on our sovereign platform while opening up the possibility of making your projects known.

As an IT expert:

SourceSup is based on the FusionForge tool which is a free forge under GNU GPL licence.

As a user:

You work on IT projects with people from the education-research community but also with people from outside it.
